I am tired of the NAB and it's political influence over my viewing and listening rights! The moneys they bribe you with is unfair to the American public and causes us not to have the rights we desire...such as A-LA-CARTE programming on Cable or Satellite TV. Yes, I do enjoy my free to air broadcasts, however there comes a time when technology surpasses the old ways. When they prevent me from watching a TV station via satellite from another city I prefer, or restrict my Satellite radio from carrying local traffic, news and weather, they are taking away valuable First Amendment rights that our constitution so strongly protects. Its time this monster is brought down to its knees and we need a strong congress and senate that will do such a thing. The FCC must take a stand against this UnAmerican power and let their lies and deceit slap them back in their face. Please hear the cry of this uninformed nation and remove the power of the NAB from our midst. We are tired of the biased news and information they force on us.
